## EXPERIENCE

---

### **Gupshup Technology: Associate Software Engineer: Mumbai Sept 22 to Current**

- As part of the Gupshup dev support team, I worked on the WhatsApp Business API and Gupshup's self-serve platform.
- Analyze the code and APIs used by the client and gain in-depth knowledge of the product. As a result, I gained a lot of knowledge about debugging.
- Raised and communicated with the META and WhatsApp teams regarding the issues and problems regarding WhatsApp Business.

### **Kalvi Educations | Technical Content Engineer Internship: WFH Aug - Sept 22'**

- Produced web development content such as Angular, React, Javascript, etc.
- I have developed projects and assignments for students taking the course.

## PROJECTS

---

### **GitHub Finder ( ReactJS, GitHub API, Bootstrap, Axios )**

- Live Project - <https://github-finder-react-omkar.netlify.app/>
- With a username, you can find information and all repositories of any Github user.
- To obtain user and repository information, we are using Github's REST API
- This is kind of like a GitHub clone

### **Sudoku Solver (Python, Backtracking Algorithm)**

- GitHub link - <https://github.com/Omkar-Desai01/Sudoku-Solver>
- Instead of using the 9 pow 81 solution that takes forever, I used backtracking to solve it.

### **Markdown Maker (React.js, React MDM )**

- Live Project - <https://markdown-maker.netlify.app/>
- This website lets you create markdowns for GitHub and preview them
- Using the browser API, all Notes and Markdowns are stored in the local storage.

## Technologies and Languages

---

- JavaScript - 4.5/5, Python - 4/5
- React, Node, Express, Git, GitHub, Problem-solving, Docker.

## EDUCATION

---

### **Nirmala Memorial Foundation - Kandivali.**

Bachelor of Science in Information Technology,  
CGPA: 8.22

June 2019 - June 2022
